Projects

goghbuy | <https://github.com/Hunyh/goghbuy>

- Users are able to create an account/profile and buy/sell displayed artwork and are able to checkout through Stripe's payment system.
- This project accomplishes a full stack web application giving the users the full web experience. My role was to create the user profile page as well as the navigation system.
- Tools/Languages: React, Javascript, MongoDB, GraphQL, MaterialUI, Stripe, Express, Node, CSS

Health Tracker | <https://github.com/Hunyh/health-tracker>

- Allows the user to be able to create an account and keep track of daily exercises by typing in their accomplished workout.
- This is useful in the daily life of someone who is into fitness or wants to start keeping track of their workouts. I handled a lot of back-end functionality during the process of building this application.
- Tools/Languages: HTML, Javascript, MongoDB, Express, Node, CSS, Bootstrap, Handlebars

The Huddle | <https://github.com/Hunyh/the-huddle>

- Allows the user to search their favorite football team to see their schedule and get a weather forecast for the upcoming week.
- This project uses two third party API source's giving the user the ability to get real time weather forecasts and the schedule for their favorite team. I handled working with the one API during this project.
- Tools/Languages: HTML, Javascript, CSS, Bulma, JQuery

Education

Rutgers University, New Brunswick

February 2022

Full Stack Web Development Coding Certificate

Relevant coursework: Created a plethora of projects throughout the course using many different front-end and back-end technologies. Putting both of those together to create full-stack web applications.

Stockton University, Pomona NJ

May 2019

Bachelor of Science (B.S.) in Finance
